

## Money-saving, No Installation, All-in-one Audio System

### REDCAT®

#### The plug-and-play way to advanced intelligibility

REDCAT, a single sound panel audio solution, uses exciter technology to effectively distribute the teacher's voice throughout the classroom. Logically, it also happens to save tremendously on audio technology expenses. Installation of a traditional, cone-speaker based classroom audio system easily adds 30+% to the cost of equipment.

#### Installation required: none

With literally no cost of installation, REDCAT delivers maximum value for every technology dollar. Use it right out of the box. Just wear the comfortable, lightweight mic. Turn it on. And let your natural voice be heard. While the REDCAT's footprint may be modest, the results are anything but.

#### Full access to teacher's natural voice

Exciter technology takes advantage of the teacher's natural voice and sound reflection from walls, ceiling and floor.

#### Integrates wirelessly with other media

Infrared wireless technology makes it easy to connect REDCAT to other audio sources (e.g., computers, DVD players).

#### Eliminate feedback, once and for all

Microphone and sound panel system are so perfectly tuned they prevent feedback, no matter where teachers stand.

#### The iRMC Media Connector

##### Cost-saving, No installation Solution for Audio Integration

The iRMC Media Connector is designed to integrate and amplify all classroom multimedia audio sources with ease. Computers, DVD players, MP3 players, etc. can be connected to the compact device which wirelessly transmits the signal to a Lightspeed classroom audio system for crystal clear amplification.

## Use your property grants to ensure ALL your students can hear

*"The board of trustees can use the property grant to install classroom sound field systems. These systems distribute the teacher's voice throughout the classroom (via speakers) and can benefit a number of students by improving the level of the teacher's voice relative to background noise at the student's location in the classroom."*
