

Sitech Systems N.Z. Ltd

IP Based Paging Systems for Campus-Wide Announcements, Emergency paging
Musical bell solution and Intercoms

Why Replace your School Bell

Direct Emergency Notifications | School Wide Announcements/Intercom
Music Replaces Bell | IP Based/No Server Required | Access 5YA Funding
Current Failing Cable Infrastructer | Office personal saftey

Sitech Systems NZ Ltd is the national distributor for Kintronics

Access (5YA) Funding

Record Emergency announcements to keep staff in a safe environment.

Musical Bell Solution

Create your own audio files or use music tracks for the beginning or end of classroom sessions

Simplified Installation

PA speaker amplifiers and intercoms can be mounted around the campus indoors or outdoors

Now it's easier than ever to install a campus-wide paging and/or intercom system using your existing Ethernet network. It can be used to provide emergency notification to the campus or specific messages to each room.

Customised to suit your Requirements

Small amplifiers can be placed wherever you have a network drop. No need for long speaker wire connections from a large central amplifier. TalkMaster software runs on your PC, manages the system and provides digital voice quality sound wherever you need it.

Kintronics does not require a server

This makes the system more affordable and less prone to failure.

Speaker systems that connect directly to the network are the simplest and **quickest to install**. No need to run speaker wires, just plug the speaker system into your **PoE** type network.
