

Are you ready for a LED display?

A Practical Pre-Install Checklist.

Thinking about upgrading to a vibrant LED display? Use this simple checklist to assess your space, plan with confidence, and take the next step.

Your space

- ☐ We currently use a projector or pull-down screen
- ☐ The screen is often hard to see from the back of the room
- ☐ The space is used for presentations, events, or gatherings
- ☐ There is natural light or windows affecting visibility (LED performs well in bright spaces)
- ☐ The space is multi-purpose (e.g. events, meetings, performances, sport, or foot traffic)

Usage & Durability

- ☐ We need a screen that can handle regular use (and the occasional bump or knock)
- ☐ We're looking for a long-term, low maintenance solution
- ☐ The system needs to be easy for staff or users to operate
- ☐ The display will be used for important moments (events, presentations, announcements, performances)

Content & Engagement

- ☐ We regularly display visual content (presentations, videos, events, messaging)
- ☐ We want content to be clearly seen by everyone in the room
- ☐ We want to create a more engaging, professional experience
- ☐ We want the display display reflects our brand, people, or organisation

Connectivity & Setup

- ☐ We currently connect via HDMI
- ☐ We use (or want to use) wireless options like Chromecast or Apple TV
- ☐ A built-in media player would make things easier
- ☐ We'd like help choosing the right screen size for our space (3m, 4.2m, or 5m wide)

Planning & Budget

- ☐ We're reviewing our technology or fit-out budgeting
- ☐ We want to plan installation with minimal disruption
- ☐ We need guidance on the best solution for our space
- ☐ We're considering options and gathering information

0–5 → "You might not need LED yet"

6–10 → "Worth exploring options"

10+ → "Let's talk"

If you've ticked 10 or more boxes, you're in a great position to upgrade to an LED display.
